EDUCATION

The University of British Columbia
B.Sc. in Computer Science, with Distinction

Vancouver, BC
Sept. 2020 – May 2024

Dean's Honour List

2020 – 2021

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, Swift, SQL, C/C++
Backend: Spring Boot, FastAPI, REST APIs, Node, Celery, Kafka, Redis
Frontend/Mobile: React, Next.js, SwiftUI, HTML/CSS, WebGL
Data/DB: PostgreSQL, MySQL, SQLAlchemy, Spring Data JPA, pandas, NumPy, scikit-learn
Tools/Testing: Docker, Git, GitHub Apps, Webhooks, AWS, Jenkins, Postman, Gradle, JUnit, Mocha, Chai

EXPERIENCE

Software Developer
OlaTech Corporation

May 2024 – Present
Remote

- Shipped SaaS platform features across membership management, workflows, reporting, and communications.
- Designed a reliable migration framework for complex, interdependent data across environments.
- Developed secure REST APIs powering mobile authentication, messaging, and user data workflows.
- Built reporting dashboards and Kafka-based data pipelines integrating external systems.

Teaching Assistant – Applied Machine Learning
The University of British Columbia

May 2023 – Jun. 2023
Vancouver, BC

- Hosted post-lecture office hours, assessed student work, invigilated exams, participated on student forum.
- Gained experience in machine learning with Python, addressing student course-related concerns.
- Provided solutions to various technical challenges: e.g., environment setup, debugging student code.

PROJECTS

AgentAway | Python, TypeScript, FastAPI, Next.js, Celery, PostgreSQL, Docker, GitHub Apps

May. 2026

- Built a GitHub App workbench for supervised AI coding-agent runs across linked repositories.
- Implemented issue-command workflows using FastAPI, Celery, Redis, PostgreSQL, and Next.js.
- Secured webhooks, encrypted provider keys, scoped API tokens, repository permissions, rate limits, and audits.
- Automated safe draft PR creation with branch isolation, path validation, and test execution.

Interval Timer App | Swift, SwiftUI, Git

Aug. 2024

- Implemented customizable interval settings to allow users to configure set, rep, rest durations, and alert preferences.
- Integrated concurrent timer and stopwatch that preserve progress across app sessions.
- Enabled seamless background sound integration, allowing alerts without disrupting background sounds.

UBC Course & Room Explorer | TypeScript, Node, Mocha, Chai, Git

Sept. 2022 – Dec. 2022

- Designed and iteratively developed app components in strict adherence to customer specifications.
- Verified expected behaviour on problems with unbounded number of solutions via expressive tests.
- Strengthened communication and teamwork skills by participating in an Agile scrum environment.
- Devised and implemented an efficient approach to perform a generic query on JSON data.
